

10 Tips to Prevent and Detect Termites

- 1. Keep mulch at least 12 inches from the foundation of your house.**
- 2. Remove all scrap wood and wooden debris from around the house.**
- 3. Make sure your sprinkler system does not over water near the foundation of the house.**
- 4. Keep gutters clean of leaves and debris.**
- 5. Make sure your gutters discharge water at least 3 feet away from the house.**
- 6. Look for piles of discarded termite wings on windowsills, countertops and floors.**
- 7. Look for small piles of wood residue or shavings as well as tiny wood holes, crumbling drywall and sagging doors.**
- 8. Beware of bubbled paint or visible, pencil-sized mud tubes running across concrete or connecting soil to wood.**

Schedule an annual termite inspection for your home.
